Contents Volume 72

Contents

QoS management specification support for multimedia middleware
H.A. Duran-Limon and G.S. Blair 1

Fair blind threshold signatures in wallet with observers
W.-S. Juang and H.-T. Liaw 25

Traps in Java
J.-T. Chan, W. Yang and J.-W. Huang 33

Extraction of Java program fingerprints for software authorship identification
H. Ding and M.H. Samadzadeh 49

An uncaught exception analysis for Java
J.-W. Jo, B.-M. Chang, K. Yi and K.-M. Choe 59

Resource space model, its design method and applications
H. Zhuge 71

A unified approach to a fair document exchange system
N. Zhang, Q. Shi and M. Merabti 83

Password-based user authentication and key distribution protocols for client–server applications
H.-T. Yeh and H.-M. Sun 97

Rule-based generation of requirements traceability relations
G. Spanoudakis, A. Zisman, E. Pérez-Miñana and P. Krause 105

A controlled experiment investigation of an object-oriented design heuristic for maintainability
I. Deligiannis, I. Stamelos, L. Angelis, M. Roumeliotis and M. Shepperd 129

Domain-oriented software development environment
K.M. de Oliveira, F. Zlot, A.R. Rocha, G.H. Travassos, C. Galotta and C.S. de Menezes 145

A development environment for customer-oriented Internet business: eBizBench
C. Lee, B. Choi and H. Lee 163

Information theory-based software metrics and obfuscation
S.R. Kirk and S. Jenkins 179

Virtual reality systems estimation vs. traditional systems estimation
M.I. Sánchez-Segura, J.J. Cuadrado, A.-M. Moreno, A. de Amescua, A. de Antonio and O. Marbán 187

Architecture modeling and evaluation for design of agent-based system
S.K. Lee and C.S. Hwang 195

ISO quality standards for measuring architectures
F. Losavio, L. Chirinos, A. Matteo, N. Lévy and A. Ramdane-Cherif 209

doi:10.1016/S0164-1212(04)00071-8

A flexible method for maintaining software metrics data: a universal metrics repository
W. Harrison 225

Modeling change requests due to faults in a large-scale telecommunication system
H.-W. Jung, Y. Lim and C.-S. Chung 235

Capture–recapture in software inspections after 10 years research–theory, evaluation and application
H. Petersson, T. Thelin, P. Runeson and C. Wohlin 249

A case study of a reusable component collection in the information retrieval domain
W.B. Frakes 265

Changing perceptions of CASE technology
B. Lundell and B. Lings 271

Prototyping an integrated information gathering system on CORBA
Y.-S. Chang, K.-C. Liang, M.-C. Cheng and S.-M. Yuan 281

Code compression by register operand dependency
K. Lin, J.J.-J. Shann and C.-P. Chung 295

A page-coherent, causally consistent protocol for distributed shared memory
A.E. Campos and J.E. Navarro 305

Adaptive message scheduling for supporting causal ordering in wide-area group communications
T.-C. Hou, C.-H. Yang and K.-J. Chen 321

A new Petri net modeling technique for the performance analysis of discrete event dynamic systems
S.M. Koriem, T.E. Dabbous and W.S. El-Kilani 335

A new disk-based technique for solving the largeness problem of stochastic modeling formalisms
S.M. Koriem and W.S. El-Kilani 349

Implementing innovative services supporting user and terminal mobility: the SCARAB architecture
L. Ciminiera, P. Maggi and R. Sisto 367

A software/hardware cooperated stack operations folding model for Java processors
L.-R. Ton, L.-C. Chang, J.-J. Shann and C.-P. Chung 377

The design and implementation of a runtime system for graph-oriented parallel and distributed programming
J. Cao, Y. Liu, L. Xie, B. Mao and K. Zhang 389

A reactive system architecture for building fault-tolerant distributed applications
C. Chen, W. Jia and W. Zhou 401

Analyzing reconfigurable algorithms for managing replicated data
I.-R. Chen, D.-C. Wang and C.-P. Chu 417

A novel algorithm for multimedia multicast routing in a large scale network
C.-F. Tsai, C.-W. Tsai and C.-P. Chen 431

The design and analysis of a quantitative simulator for dynamic memory management
C.-T. Dan Lo, W. Srisa-an and J. Morris Chang 443

A client-based logging technique using backward analysis of log in client/server environment
H.-G. Cho, Y.-M. Park, C.-S. Lee, D.-H. Kim, J.-H. Baek and E.-I. Choi 455
